# ABOUT US

Jivesna Tech is a leading technology company committed to transforming libraries into modern, smart, and efficient digital environments. With 12 years of proven expertise and a growing network of 250+ satisfied clients, we deliver advanced automation solutions that enhance the way libraries manage resources, serve patrons, and operate daily.

We offer a complete range of services, including Koha Library Management System, D-Space Institutional Repository, E-Library solutions, RFID-based automation, AI-powered Smart Patron Counter, and a variety of customized hardware solutions. Our strong technical foundation ensures seamless integration, reliable performance, and long-term operational stability.

At Jivesna Tech, our mission is to empower libraries through technology that simplifies management, improves accessibility, enhances accuracy, and supports full-scale digital transformation. Trusted by institutions across the country, we continue to innovate, upgrade, and deliver solutions that make libraries smarter, faster, and future-ready.

Innovation                    Quality                    Unyielding Integrity

# E-LIBRARY

## eLibrary – Smart Digital Library Solution
## By Jivesna Tech

Transform Your Library into a Digital Knowledge Hub
Our eLibrary solution provides seamless access to digital resources anytime, anywhere. Designed for universities, colleges, schools, and research institutions, it combines powerful technology with user-friendly access.

## Key Features

✅ Web-based & Mobile-friendly
✅ Remote Access (Off-Campus Login)
✅ Open Access & Subscription Resources
✅ Single Search Interface (Discovery Service)
✅ E-Books, E-Journals, Theses, Articles & Videos
✅ Integration with Koha, D-Space etc.

✅ Advanced Search & Filters
✅ Automatic Metadata & Book Cover Fetching
✅ Usage Statistics & Reports
✅ Secure User Authentication
✅ Multi-language Support

## Benefits

✔ 24×7 Access to Knowledge
✔ Faster Research & Learning
✔ Reduced Physical Infrastructure Cost

✔ Centralized Digital Library
✔ Enhanced User Experience
✔ Campus & Remote Access Support
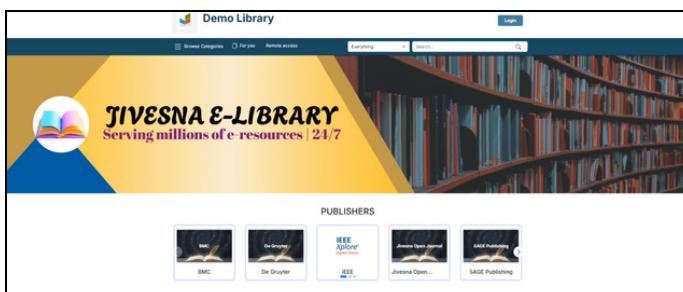

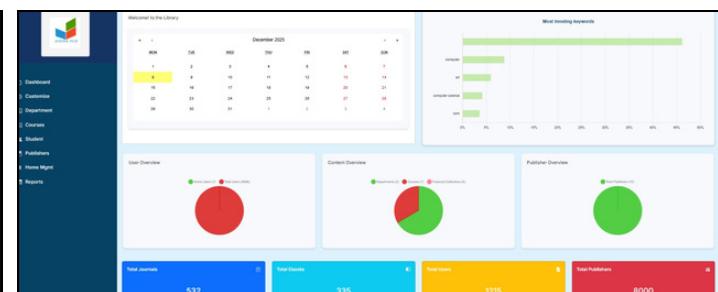

# RFID/EM

## for effciency and security

**RFID Self-Check System**
for fast, contactless book Check In and Check Out

**RFID Gate**
ensuring secure and library protection.

**RFID Book Drop Box**
for secure, contactless, and 24/7 book returns

**DLA**
Designed to locate books easily and keep library inventory up-to-date.

**Workstation**
designed for smooth RFID tag programming and efficient check-in/check-out.

**RFID Tag**

# SOFTWARE SOLUTION

## Koha – Library Management System (LMS)

Koha is a fully web-based, open-source Integrated Library Management System used by libraries worldwide. It provides a complete solution for managing books, members, circulation, and digital resources.

Key Features of Koha
- Cataloging: Create and manage bibliographic records with MARC21 support.
- Circulation: Easy issue/return, renewals, reservations, and fine management.
- OPAC: Online public catalog for users to search, reserve books, and check availability.
- Patron Management: Add and manage different user categories such as students, staff, and guests.
- Reports: Generate automatic and custom SQL-based reports.
- Acquisitions: Manage vendors, budgets, and purchase orders.
- Serials Management: Track magazines and journal subscriptions.
- RFID Integration: Supports self-check kiosks, security gates, and fast issue/return.

## Modules of Koha

| Cataloging | Circulation | Member Management | OPAC |
|---|---|---|---|
| Serials | Administration | Acquisition | Report generation |
| Advance search | Tools | Reserves | Authorities Control |

## DSpace – Digital Repository System

DSpace is an open-source digital repository platform used by universities, libraries, and research institutions to store, manage, preserve, and share digital content.

It provides a secure and organized way to archive research papers, theses, dissertations, articles, images, videos, and other digital materials.

Key Features of DSpace
- Digital Content Management: Store and organize all types of digital files.
- Communities & Collections: Hierarchical structure for easy content grouping.
- Metadata Support: Uses Dublin Core and other metadata standards for accurate cataloging.
- Search & Browse: Powerful tools to search, filter, and browse repository content.
- User Access Control: Manage permissions for authors, reviewers, and administrators.
- Submission Workflow: Multi-step review and approval process.
- Persistent Identifiers: Supports Handles/DOIs for permanent access links.
- Open Access Support: Ideal for institutional repositories and academic publishing.
- Preservation: Ensures long-term digital preservation and backups.

# PRODUCTS

## HARDWARE SOLUTIONS THAT ENSURE SMOOTH AND SEAMLESS OPERATIONS

### KIOSK

Reliable kiosk solutions designed for seamless user interaction and automated services.

01.

### DIGITAL SINAGE

High-definition digital signage for dynamic content display and smart information delivery.

02.

### FLAP BARRIER

A smart access control system with automated flap panels for guided passage. with smart report

03.

### RFID BASE ATTENDANCE SYSTEM

A smart solution for automatic attendance recording and monitoring.

04.

05.

**SMART CARD**    **ID CARD PRINTER**    **BARCODE PRINTER**    **BARCODE SCANNER**

# SMART PATRON COUNTER

**Truly a Smart alternative to the Manual Registers maintained in your Library**

## IDENTIFICATION METHODS

- **FACIAL RECOGNITION**
- **BIOMETRIC/ FINGERPRINT**
- **BARCODE**
- **SMART CARD**

A fully web-based, paperless system that offers real-time tracking, automatic data handling, and seamless integration with any Library Management Software.

Patrons simply select their purpose of visit, enabling the system to generate accurate and detailed usage reports.

Admins can send notices, manage updates, and access flexible reporting options such as PDF, Excel, and more.
